

MICROWAVEABLE PASTA PRODUCT

ABSTRACT OF THE DISCLOSURE

5 A microwaveable pasta product is provided. The product comprises a dried pasta product in a microwaveable container. The microwaveable container comprises a bowl having a generally-ovular bottom and a generally-ovular outer wall in generally-perpendicular relation to the circumference of the generally-ovular bottom. The bottom and outer wall together define a cavity in which the dried pasta product is contained. The container accommodates foam expansion without sacrificing product appearance or shelf space.
